

Modular Shielded Unloaded Patch Panel

Shielded Patch Panel with Rear Cable Management Bar

Infinique's Modular Shielded Unloaded Patch Panels for Category 6 and Category 6A Keystone Jacks are 19" rack mountable panels and can accommodate up to 24 or 48 Shielded Keystone Jacks with 1U height. The shielded keystone jacks can be snapped in easily, without the need for any tool and the jacks also be removed easily if required. The shielded patch panel is modular and has a dual frame construction for sturdy support of the shielded keystone jacks which have 110 IDC terminations on the rear side.

In the front of the panel 1 to 24 or 48 ports are numbered clearly for easy identification. The patch panel comes with a clip-on rear cable management bar that can be mounted to the back of the panel without the need for mounting screws. The rear cable management bar provides support for cable routing and strain relief. Accessories included are Rack Mount Screws, Labels, Cable Ties, Earthing and Grounding. These panels have rugged construction and superior design with

powder coated black finish and made of SPCC Cold Rolled Steel. This design provides enhanced plug-to-jack connection integrity and protects against damage caused by insertions.
